## TERMS

The Prices in this list are for goods delivered at the purchaser's nearest railroad station all charges prepaid, except by special agreement, and any such agreement must be duly entered on the order.

### Cash on Delivery.

We Pack Carefully and agree to replace free any stock that fails to reach the customer in good, healthy condition if notified immediately on arrival of such stock. We further agree, should any tree or plant sold by us prove untrue to name, that we will replace same free of charge or return purchase price. It is mutually agreed between the purchaser and ourselves that we are not to be held liable for a greater sum than was originally paid for stock.

**Freedom From Disease.**—Our Nursery is inspected each year and we hold a certificate showing our stock to be free from injurious insect pests, a copy of which accompanies each shipment.

### Parcel Post, C. O. D.

Many small orders can be sent direct in this way, if the purchaser so desires. Orders to be sent Parcel Post, C. O. D., must amount to at least \$2.00.

**STRAWBERRIES**

**"Do not sell Strawberry Plants for Fall Delivery."**

No gardener or fruit grower plants Strawberries in the fall.

Our Strawberry plants are all freshly dug at time of shipment. Varieties marked (Per) have perfect blossom and will fruit when planted alone. Those marked (Imp) have imperfect flowers and will not fruit when planted alone, but must have some of the perfect flowering sort planted with them—one-third to one-half is about the proportion.

**STANDARD APPLE TREES**

Plant an apple tree for its blossom, fruit, and shade.

Those varieties marked (a) are of first degree of hardiness and are adapted for northern latitudes where extreme hardiness is the first consideration.

Those marked (b) are recommended for general planting in latitude of central and southern Wisconsin.

Those marked (c) near Lake Michigan and in the protected locations.

	Each	Doz.	100
Select 5-6 ft. -----	\$1.25	\$14.00	\$100.00
No. 1 4-5 ft. -----	1.00	11.00	75.00
No. 1 3-4 ft. -----	.75	8.00	50.00

We recommend the 5 to 6 ft. grade as the most satisfactory to plant and the grade we sell the most of.

The following group make up the safest and best well known varieties for the entire region we cover:

*Duchess (a)	*N. W. Greening (b)
*Delicious (b)	*Salome (b)
*Forest Winter (a)	*Tolman Sweet (b)
*Fameuse or Snow (b)	*Windsor (b)
*Liveland (a)	*Wealthy (a)
*Mc Intosh (b)	*Yellow Transparent (a)

We can usually furnish the following varieties if wanted:

Ben Davis (c)	Northern Spy (c)
Gano (c)	Patten Greening (a)
Grimes Golden (c)	Pewaukee (c)
Golden Russet (c)	Red Astrachan (b)
Jonathan (c)	Wolf River (b)
Longfield (a)	Winesap (c)
Maiden Blush (c)	St. Lawrence

**Special Varieties**

These, with the exception of Malinda and Tetofsky, are comparatively new sorts and we consider them worthy of trial.

Each, \$1.50	3 for \$4.25	Dozen, \$17.00
Anoka	Malinda	
Cortland	Macoun	YELLOW DELICIOUS
Dolga Crab	Red Duchess	
Early McIntosh	Red Delicious	
Haralson	Tetofsky	

NOTE:—For the benefit of the customer, sell those marked with (\*).

**APPLE (Continued)****Forest Winter**

The following is taken from the May issue of The Wisconsin Horticulture:

"Mr. F. B. Sherman of Edgerton, who is a prominent fruit grower, says that his best money maker is the Forest Winter apple. Ten trees of Forest Winter have made more money for him than three times that many McIntosh."

The Forest Winter matures late in the season and is a sweet apple. Some of Mr. Sherman's neighbors think it is better than the Delicious. It is a good keeper and he has no trouble in disposing of all he can produce. It yields very well in his orchard."

**Crab Apples**

Each, \$1.25	Dozen, \$14.00
Florence (a)	Sweet Russet (a)
Hyslop (a)	Whitney (a)
Dolga Crab, see special varieties	

**CHERRIES****First Class 4-6 ft.**

3-4', each, \$1.25	Dozen, 14.00	100, 100.00
Early Richmond	L. Montmorency	
Eng. Morello	Wragg	

Sweet cherries will not succeed in Wisconsin. We can furnish Black Tartarian and Gov. Wood—\$2.00 each.

**CHERRY PLUMS AND HANSEN HYBRIDS**

We recommend these for planting in the extreme north and where regular cherries are not successful.

4-6 feet -----	Each, \$1.50	Dozen, \$16.00
Compass (Cherry)	Opata (Plum)	
Zumbra (Cherry)	Sapa (Plum)	
Nanking Cherry, see Prunus Tomentosa		

**BETTER VARIETIES OF HARDY PLUMS**

That will put plum growing on an entirely new basis in the Northwest.

Each, \$1.50	Dozen, \$16.00	100, \$120.00
Burwood	Loring	Superior
Elliott	Monitor	Underwood
Golden Rod	Tonka	Waneta
Hanska	Surprise	De Soto

Nearly all these varieties of hardy plums do not fruit well when single varieties are planted alone. There should be included in every planting one Surprise, Hanska or DeSoto as pollenators for every 3 or 4 trees planted. They can be planted in rows or groups. We think groups are more satisfactory where planting can be done in that way.

**PLUMS (Continued)****Japanese and European Plums**

**SHADE AND ORNAMENTAL TREES****All Nursery Grown and No. 1**

NOTE: To avoid any misunderstanding regarding the sizes and grades of trees, we make the following explanation: The 6 to 8 foot grade takes in trees that are 6 feet and over up to 8 feet, but does not include the 8 foot trees. The 8 to 10 foot grade takes in those that are 8 feet and over and under 10 feet, but not the 10 foot, and so on through all grades. For example, should you wish a tree 10 feet high and 1½ inches in diameter (or caliper) you must order the 10 to 12 foot tree; 1½ to 2 inch, as the 8 to 10 foot grade does not include the 1½ inch or 10 foot trees.

## EVERGREENS

All our Evergreens are nursery grown and have been transplanted one or more times.

Many planters do not use the care necessary for success in handling evergreens and for this reason we do not make a free replacement on evergreen losses.

### **THE COE, CONVERSE & EDWARDS COMPANY GUARANTEE**

A free replacement will be made of any stock that is given proper planting and care, and fails to grow the first season after planting, EXCEPT EVERGREENS. Those will be replaced at half-price, provided we are notified of the loss by October 1st after delivery.

## HOW TO PLANT ROSES

The secret of success in planting roses is **First**, to cut back the tops severely; **Second**, to water the plants thoroughly; **Third**, to cover the newly set plants with a mound of soil.

Do not expose their roots to sun or wind, to dry out.

Prune all the canes so that not more than four buds remain on a cane. This is very important.

Put in the plant and half fill the hole with top-soil. Do not use manure. Tramp the soil down hard and pour in four gallons of water.

Next draw a mound of soil up over the bush, fully 6 to 10 inches high, thus burying the bush completely and protecting the canes from drying out before growth begins.

Allow mound of soil to remain until the new growth has pushed through it fully six inches, then hoe the mound down gradually.

When planting roses in the fall, mulch the mounds with straw or strawy manure after the first hard freeze.

## SPECIAL INSTRUCTIONS TO OUR SALESMEN

Do not vary from the prices in this list and sell only varieties that are listed.

Do not make extravagant statements to obtain orders. It is always better to do more than we promise than to promise more than we can do.

Be sure all orders are dated and always leave an **Exact Duplicate** of the order as sent to us with the purchaser. The order and duplicate must agree to be legal.

Have the purchaser place his name and Post Office address in the proper place and you re-write the name **very plainly** at the bottom of the order and also sign your name as salesman.

It is very important that the place of delivery, post office, R. F. D. or street number is plainly written. Mistakes in any of these items often cause delay and extra expense at time of delivery.

Work your territory thoroughly, making the delivery at one point as large as possible.

Do not sell less than 6 trees or plants at dozen rates, or less than 50 at hundred rates.

# Number of Trees or Plants to Set An Acre

•

The following table shows the number of trees or plants required to fill an acre of ground when planted at the given distances apart—in feet:

3x1½	.....	9680
3½x2	.....	6222
3x4	.....	3630
3x5	.....	2904
3x7	.....	2074
4x2	.....	5445
4x4	.....	2722
4x5	.....	2178
8x6	.....	908
8x8	.....	680
10x10	.....	435
18x18	.....	134
20x20	.....	108
25x25	.....	69
30x30	.....	48

If this table does not give the distances you desire to plant, divide 43,560 the number of square feet in an acre, by the number of square feet each tree or plant will occupy.
